

Homework chapter (1) P.32-33

-True or false:

- | | |
|----------|-----------|
| 1) True | 6) True× |
| 2) True | 7) True |
| 3) True | 8) False× |
| 4) False | 9) False |
| 5) True× | 10) True |

-Multiple choices:

- | | |
|----------|---------|
| 1) D ×c | 6) A |
| 2) E | 7) C |
| 3) D | 8) A ×d |
| 4) A ×b | 9) B |
| 5) C | 10) B |
| 11) D ×e | |
| 12) A | |
| 13) C | |
| 14) A ×b | 15) B |

-Review questions:

Q1) (I didn't answer this question) **(0)**

Q2) it can calculate for you whatever you want faster
(computer) that is why it was invented. **(0) computers
can store and process all types of data**

Q3) **(1)**

	Similar	Differences
--	---------	-------------

-Computers today	They both can do things that the person is lazy to do. Like (calculations).	-They smaller -Fast & easy?
-Computers from World war 2	They both can do things that the person is lazy to do. Like calculations).	-They are big -Not everyone use it. -Not fast & y can't use it e

Q4) People are using internet more and more each day, now all our life depends on the internet, there is no limit. When ever a student have an research to do they don't go to the library's because that would take a lot time to search for the book (sometimes you might not find what are you looking for), so they just go and search in the internet that way they find whatever they are looking for faster and easier. Some students take lessons through internet. Some of people make shopping through the internet; it's hard to find some one who doesn't use internet or computer those days. **(2)**

Q5) Mainframe: Information processing, making an online airline reservation or deposit money in the bank.

Disadvantage: It's a room sized machines.

Advantages: Banks and airlines use them because they can store a lot of information on it and process them, now a days the mainframe computers are not big as in old days and they are cheaper, and through this mainframe computers you can

communicate with several users simultaneously through a technique called timesharing. **(1)**

What about the microcomputers???

Q6) they are constructed of thousands of microprocessors.

Example: -computer animation.

-oil exploration.

-medical imaging

Correct

Q7) A mainframe computers.

Only?

Q8) Types of applications that well suite for handheld devices are black berry for emailing, I pod for music.

But for PC; address book, day planners.

Applications not hardware

Q9) because every one using computers every where we depend on them (computers). People use them in work, to shop online, to check there back accounts they don't have to go all the way to the bank and wait in line until you're turn you can do shopping or banking at you're house what ever time it was 24/7. Inventing the computers made people's life easier, they can do things on the computer and the result will be given out faster.

Q10) benefits of information age: So the kids will not do things that they are not allowed to in the internet, it's for there safety because there parents can't watch every move there kids do. It is just to limit kids of using web sits that they are not for kids.

-Discussion questions:

Q5) positive: TV-> people will receive news all around the world fast. **(1)** You just watch TV when you have free time. And it is not complicated thing to use, any one can use it.

Negative: TV-> Some times people spend a lot of time watching TV, sitting long time and not moving is bad for our health. **(1)**

Positive: automobile-> we don't have to walk whenever we need to go some where we can use cars it is a fast thing to use and it's easier to take you whenever you want to go, even if you are late you will be there faster then if you walked. **(1)**

Negative: automobile-> when the person sits a lot in the car it can cause a lot of health problems, every one is using cars small amount of people walk it's again effect our health because people become lazy. **(1)**

Positive: computers & internet-> It makes people's life's easier, internet you can find any information you need in a fast way**(1)**, you don't have to travel to far places to see someone we simple can use the web camera (cam), we can have classes online (not going to school) **(1)**

Negative: It's not always safe, people spend most of the time on the internet socializing, playing games or just doing unimportant things. **(1)**

And I don't think that we will be better without them, because every think now a day depend on them we got used to use all of that technology so it will be hard go not use them anymore. **(1)**

Overall (8)

Q6) people don't have to pay money to buy a CD; they can download the music and listen to it for free**(1)**. You can download any song you want any time you want but CD's change each year if not less they come go, it will be easy to download & fast, but CD's we have to go to the shop in a Particular particle time, spend money & some times you can't find what ever the CD's you are looking for. **(1)**

Overall (2)
